Profile

Senior iOS Developer (Team Lead)

CV for human readers: https://konrri2.github.io/Konrad_Leszczynski_CV.pdf

Highly skilled Senior Software Engineer with a strong background in iOS, Swift, SwiftUI, and UIKit. Experienced in implementing new technologies and optimizing app performance. Holds a Master's degree in Computing Science and has extensive experience in developing mobile applications for various industries including medical, R&D, security and commercial applications.

Author of scientific articles on Data Mining and trust/reputation in e-commerce https://konrri2.github.io/Scientific_papers.pdf

Professional Experience

Team Lead at *Escolasoft* (2025 – Present)

- Joined a strategic project for one of the largest companies in Poland (details covered by NDA).
- Promoted from Senior Developer to Team Lead based on engagement, collaboration skills, and ability to build consensus across stakeholders.
- Act as the primary technical contact for client representatives and business analysts.
- Lead technical discussions, requirement clarification, and delivery planning.
- Maintain development productivity using AI-assisted workflows with Gemini CLI and Claude Code.
- Develop and maintain a modern iOS application built with SwiftUI, TCA architecture, custom dependency injection, and extensive automated test coverage.

Senior iOS Engineer at *myWorld* (2022 – 2025)

- Developed and maintained a large-scale international e-commerce platform serving thousands of daily users.
- Worked within an MVVM architecture, contributing to the evolution and maintainability of a complex codebase.
- Refactored legacy code to improve readability, testability, performance, and long-term maintainability.
- Introduced modern iOS technologies and development practices, including SwiftUI adoption in existing applications.
- Implemented features related to loyalty programs, cashback offers, coupons, and vouchers.
- Contributed to the development of Lyconet, a companion application for merchants and marketers.
- Collaborated with international cross-functional teams to deliver scalable and reliable mobile solutions.
- Improved application quality through code reviews, architectural improvements, and knowledge sharing.

Senior iOS Developer at *Astek* (2020 – 2022)

- Served as the most senior iOS developer in the company.
- Participated in technical interviews and evaluated iOS developer candidates.
- Led technical initiatives and provided mentorship to team members.

Blick.ch (Ringier AG)

- Rebuilt mobile applications from scratch using modern iOS technologies.
- Participated in a complete redesign of the user experience and application architecture.
- Implemented a modular architecture that enabled efficient code reuse.
- Delivered an additional application version tailored for French-speaking regions.

Roche

- Contributed to **mySugr**, a Software as a Medical Device (SaMD) application for people with diabetes.
- Worked within a large-scale engineering organization consisting of dozens of developers distributed across multiple feature teams.
- Collaborated with cross-functional teams to deliver features in a regulated healthcare environment.
- Developed and maintained production code used by a large international user base.

Software Engineer at *PSNC* (2008 – 2020)

PSNC (Poznan Supercomputing and Networking Center) – one of Poland's leading research and development institutions and part of the Polish Academy of Sciences.

System Developer – *EUROfusion IT Group*

- Developed and maintained authentication and authorization infrastructure for international scientific collaborations.
- Administered Single Sign-On (SSO) solutions, VPN services, and Docker-based environments.
- Supported researchers working on fusion energy technologies.

Selected Projects

- **ePodręczniki** – Developed an electronic textbook platform for the Ministry of National Education.
- **SymbIoTe** – Contributed to an interoperability platform connecting smart devices across IoT ecosystems; also served as a hackathon mentor.
- **Conference4me** – Developed a mobile conference assistant application.

Junior C# .NET Developer – *PSNC*

- Developed software solutions for public-sector, research, and media organizations.
- Contributed to multiple large-scale projects, including:
 - **iTVP** – Interactive television platform for TVP.
 - **Platon** – National IT infrastructure project for science and research.
 - **NetRadio** – Research initiative for Polish Radio.
 - **COP14** – United Nations Climate Change Conference.

Junior System Administrator – *PSNC*

- Worked part-time while studying.
- Managed network infrastructure, VPN services, and system monitoring.
- Supported authentication systems and security-related technologies.

- Gained hands-on experience with network protocols and OAuth 2.0.

Hobby projects

Hexagonal Chess

Chess but in six directions with a simple AI bot. <https://apps.apple.com/us/app/hexagonal-chess/id6479699878>

Audiobook player

Experiments with CarPlay and integrating OpenAI Codex Audio player with many cool ways to rewind and seek <https://apps.apple.com/us/app/book-whisperer/id6752223772>

Heating system

<https://github.com/konrri2/Heating> Server: RaspberryPi+Python Client: RxSwift

Education

Master's engineer's degree in Computing Science 2003 - *POZNAN UNIVERSITY OF TECHNOLOGY*

M.Sc. Computer Science Open Ph.D. Thesis “Trust and Reputation management in the Internet and e-commerce” List of **Published scientific papers**: https://konrri2.github.io/Scientific_papers.pdf

Skills

Lots of experience: iOS, Swift, SwiftUI, UIKit, Combine, JSON, REST API, RxSwift, SQL, Storyboards, XIB Fair knowledge: GraphQL, Objective-C, Android, Kotlin Multiplatform, SQLite, C# .NET

Architecture: MVC, MVP, MVVM, MVVM+C, TCA

Tools: Xcode, Instruments, VS Code, GitHub, Bitbucket, GitLab, jira, confluence, figma, Azure DevOps, Fastlane, Postman, Proxyman, GIT, TestFlight, App Store Connect, Firebase, CocoaPods, SPM, GitHub Copilot (and other AI Coding Assistants), SwiftGen, XcodeGen, SwiftLint, XCTest Experience with frameworks and libraries: Alamofire, IGListKit, Sourcery, Factory (Dependency Injection)

AI tolls: Gemini CLI, Claude Code OpenAI Codex, Github Copilot

Techniques: Data Structures and Algorithms, CI/CD, GCD, Structured Concurrency, Swift Concurrency (), Reactive programming, OOP, Protocol-Oriented Programming, Big-O analysis (time and memory complexity), Scrum, Kanban, Agile, GitFlow

Soft skills: focused, problem-solving, work autonomously, responsibility, ownership, TDD, BDD, deep understanding of ARC, experience with AI-assisted programming

Language

- **English** (C1)Strong written and verbal communication skills. Many scientific papers published (see https://konrri2.github.io/Scientific_papers.pdf)
- **Polish** (Native)
- **German** (A2)Basic understanding.
- **Spanish** (A1)A year with Duolingo

Hobbies

3D CAD modeling, tinkering and printing Triathlon, because I like a challenge from time to time

Certificate

AI Programming

Building Gen AI App 12+ Hands-on Projects with Gemini Pro 04.2026

Vibe Coding for iOS Developers 05.2026

Securing GenAI Systems With Best Practice Frameworks - 2026

AI and Machine Learning

AI Engineer Professional Certificate Course

iOS Machine Learning with Core ML2 and Swift5

Machine Learning and Artificial Intelligence Using Swift

Complete iOS Machine Learning Masterclass

Artificial Intelligence for Simple Games

Artificial Intelligence A-Z 2025: Agentic AI, Gen AI, and RL

Professional macOS Programming

Learn OAuth 2.0 - Get started as an API Security Expert

SwiftUI - Declarative Interfaces for any Apple Device

The Complete Guide to Combine Framework in iOS Using Swift

Mastering RxSwift in iOS

How to evolve a legacy iOS Application written in Swift

MVVM Design Pattern in iOS Using SwiftUI

RxSwift & RxCocoa with X Code 10 & Swift 4.2

Testing iOS Apps - Behavior Driven Development Using Swift

Unit Testing Swift Mobile App

The Swift Arcade Professional iOS Development Course - UIKit

GraphQL with iOS and SwiftUI: The Complete Developers Guide

Kotlin Multiplatform Masterclass - KMP, KMM - Android, iOS

Unity C# Mobile Game Development: Make 3 Games From Scratch

FreeCAD 1.0 i n 25 Days : Complete CAD Course
